

Mynämäki Topo

Mynämäki Topo

General Information

How to :

From Turku drive to Raisio. Take the 'Porintie' road 8, towards Rauma/Pori. Mynämäki is about 25 km (20 min) from Raisio.

Area 0: is 2,8 km after Mynämäki Centrum (from the S-Market). Park to the 'Tiehallinto' rest place.

Area I: is 8 km from Mynämäki. Take right to the 'Kaiunkalliontie' sandroad, and drive (600m) until you see a house in 'Y'-crossroad. Take the left road and drive for more 200m. Park right to a sand-area.

Area II: is 10 km from Mynämäki. There a road sign 'Lemmi' on the right side. Take right, park to one of the areas marked with P. For sector C in area II drive 1,4 km further 8-road, and park to the open area in wood.

Area 71: is 2,8 km from Nousiainen grossroad, 8 km *before* Mynämäki 'city'. From road 8 take left to 'Kärrynten' and drive 2 km. Again left to sand road with sign '3 Kärrynten', after 1,8 km turn left to 'Hyrköntie'. Drive this about 700 m. Park to marked spots.

Area 73: asto area 71, but instead going left to Kärrynten continue straight 2 km for area A. 4 km for area B.

Area 69: ...summertime ...

Bouldering:

There are at the moment 5 bouldering areas having totally 14 sectors. Currently there are about 350 boulder problems. Boulders of all sizes and difficulty can be found from the areas. Landings are in general good, though pads and spotter are however useful in some problems marked with '!'.

Other:

Do **NOT** walk over the fields! Do **NOT** block the roads to fields. Do **NOT** litter.

The grading in Mynämäki tries to follow the mynämäki (french boulder) grading. The maximum height of the boulder/rock is marked after the rock number eg. KIVI 3 (5 m) in some sectors.

Area I sector C is basically very poor.

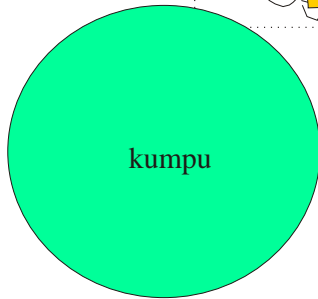

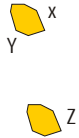

This topo will be updated every now and then. Please send (boulder) PICTURES, your comments, new boulders, etc. to: Jouni.Rantanen@ericsson.com. Seems that people don't have access to email... some nice FAs never reported directly by brave ones.

Changes: new area 73 including 'Voima', 'X-mies', '5.14' etc. Some old projects done in 71 area (latokivi) (route not named).
